Technology

The duration of the performance is 45-50 minutes.

The play takes 35 min., it begins with the admittance (plus 5 minutes) and is ending when the last child has researched the stage after the show (plus 10 minutes)

It is possible to play two performances for one day..
It must be about 1 hour between the performances.

We need approximately 3 hours to set up the stage, including lighting.
We need 1 hour to take it down.

Stage minimum: 6,50 m depth x 5,20 m breadth and a room height of 3,15 m.

The area must be dark. We are playing at ground level and frontal. The stage floor has to be dark or black. In the distance of 1,50 m to the stage floor can be installed rising seat rows without center aisle.

Max. number of viewers: 80 persons

It is important that the audience can see the stage floor – so gently inclined seats (at about 8 meters width) without an aisle in the middle for the audience would be best.

There should be a distance of about 1.50 meters to the stage.

We can bring a seating carpet for about 50 children that can go over 3 audience levels. That would emphasize the lounge character of the show.

We can bring our own light and operate it ourselves.

If possible and if previously agreed, we appreciate stage illumination provided by the host theatre.
Then please provide:

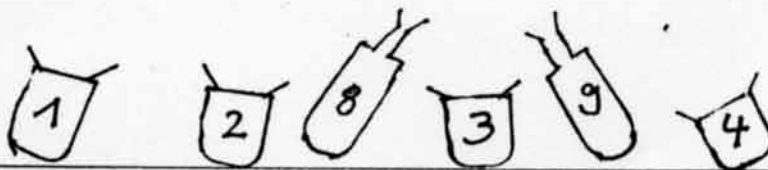

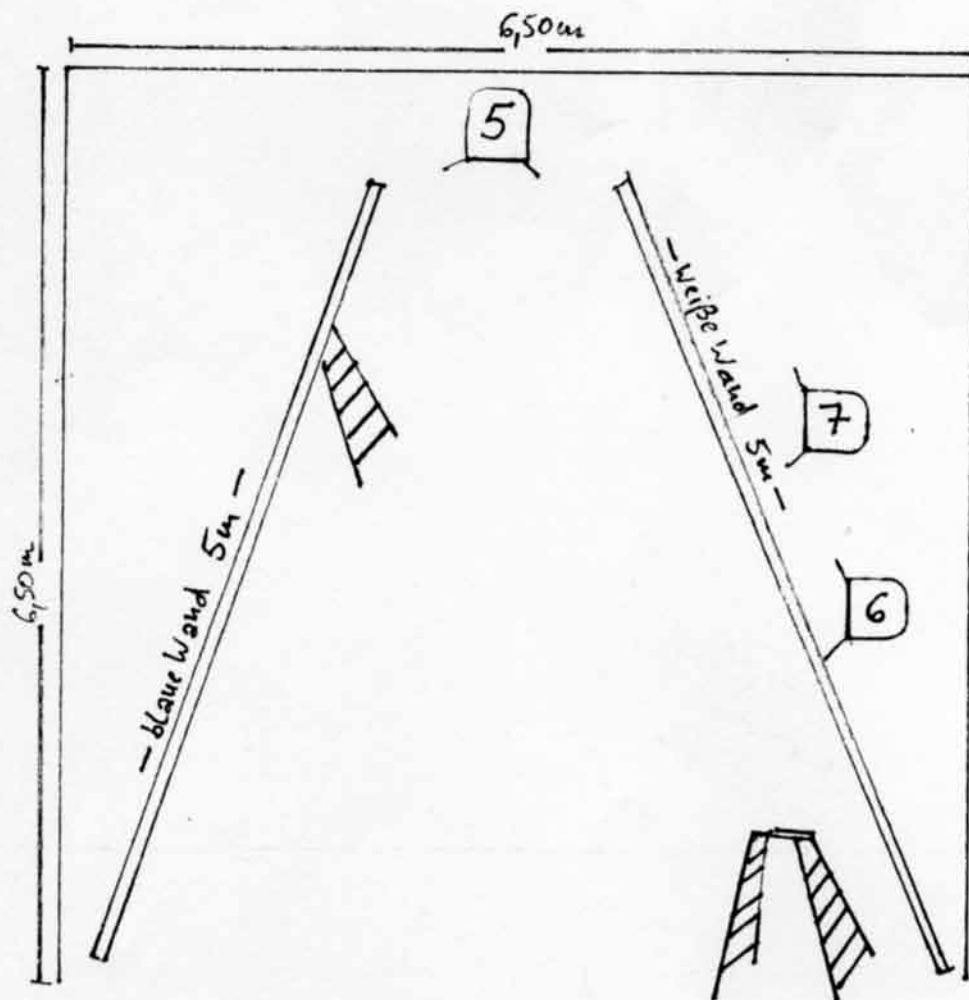

7x PC à 500-1000 W with barn door

2x Profil à 500-1000W with Iris-aperture

Colours: 2x dark blue (119), 1x golden amber

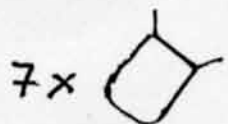

We need your 3- or 5-pole DMX kabel on stage.

LICHT PLAN : HASE HASE MOND HASE NACHT

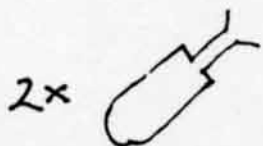

TRAVERSE

Legende:

7x PAR mit Torblende à 500/1000 W

2x Profilscheinwerfer mit Iris-Blende à 500/1000 W
