Mr & Mrs Sommerflügel

REQUIREMENTS FOR THE STAGE

Max. number of viewers: 80 persons on inclined seats.
If there are no rised rostrums we play for max 60 persons.

Length of the show: 30 min.

Time needed for preparing the stage: 2,5 hours

Time needed to clear the stage: 45 min.

There should at least be a 1-hour-break between two shows.

Acting space:

ca. 7 m breadth and 4 m depth
and 3 m height

It must be possible to completely darken the room.

Situation of the audience:

We play on the same level as the audience, facing them. It is important that the audience can see the stage floor—so gently inclined seats (at about 8 meters width, with optimal rising rows of 30 /60 /90cm) without an aisle in the middle would be best. There should be a distance of about 2,50 meters to our stage.

We can bring a seating carpet that can go over 3 audience levels. That would emphasize the lounge character of the show. If you have, please give us cushions.

Light:

We need a connection for heavy current of 16 A / 32 A or
two separate circuits of 16 A each.

The plugs in Germany and in the UK are different. Please organise for us: 2x convertor
between german schuko and 13A plug.

During the show we operate the light ourselves by a lighting desk and a remote control.

We can bring our own light

—or—

if your venue has lights, we will use

4 PC lights 650-1000 W with barn doors and 2 x filter colour No. 201

2 Profiler 650-1000W

4 dips/ floor pockets

1 circuit à 230V

We also need a connection by dmx cable (5- or 3-pole) between our lighting desk and your dimmer packs. Please set us the dmx cable until our background center.
